

## Dragon Adventurer Ability Quests

### Dragon Tutorial and Training Island

The guides section of Horizons.GamersInfo.net has walk-throughs designed to supplement the in-game text for the [Dragon Tutorial Island of Skalkaar](#) and the dragon experience on the [Training Island of New Trismus](#). This document is designed to pick up once you leave New Trismus and present all the options dragons have available for questing. There are generally four types of dragon quests: dragon adventurer abilities, dragon crafter abilities, dragon lairshaper abilities, and adventuring quests. The adventurer ability quests give you new active abilities that are helpful while adventuring, as well as passive abilities that increase the effectiveness of tooth and claw attacks, primal spell attacks, breath weapon attacks, or armor. The crafter ability quests passively increase the efficiency of your different gathering and refining abilities. The lairshaper quests passively increase the efficiency of your lair-building skills. The adventuring quests have various rewards and are more storyline driven than the other quests. Note that only the dragon-only quests are listed in the adventuring quests section; there are many quests designed for bipeds that dragons can do, and many of them have rewards that will benefit dragons as well as bipeds.
